	Truck with Soviet Air Force driver. Daily observed departing from this barracks laden with rations for nearby Trollenhagen airfield.	50X1-HUM
2.	Military Activity in Neubrandenburg:	
	On 22 September 1953, a convoy consisting of 19 trucks, four tank trucks, 1 field kitchen and 16 rocket launchers, passed through Neubrandenburg and departed in the direction of Penzlin. The rocket launchers fitted on Studebaker trucks were observed to protrude only as far as the driver's cab and appeared to have a double bank of rocket rails.	
3.	• Moderation of the state of th	0X1-HUM
4.		
4.	Former Torpedo Experimental Station (TVA) Neubrandenburg: The former TVA situated south-west of Neubrandenburg adjoining the Trollensee is at present being used solely as a Soviet military workshop and assembly depot. Occasionally trucks have been observed entering the built-up area laden with large packing cases all of a uniform size estimated at measuring approximately 2 meters x 2 meters x 1 meter. In addition, on two occasions 6 JS-3's were observed being brought in on flats. It was learned one main complex is engaged solely in assembling 12-cylinder V-bank tank engines.	50X1-HUM
5.	The entire area is patrolled by blue-uniformed Volkspolizei armed with machine carbines and using guard dogs. A three-meter-high wooden fence, in which all gaps and holes in the palings have recently been filled in, completely encloses the complex.	
6.	The former workshops actually adjoining the lake are still in a derelict state and no attempts have as yet been made at rebuilding them. The former piers which extend approximately 200 meters out into the lake are completely unusable and during the past month steps have been taken to remove the piles supporting the pierheads. There are no signs of any moorings in the lake, the latter being patrolled by a single low-speed motor launch manned by four blue-uniformed members of the Volkspolizei. Until recently there has been a notice on the shore warning people not to approach within 300 meters of the shore; but this has been removed and replaced by another notice expressly forbidding any approach within 700 meters of the establishment.	

SECRET/CONTROL - U.S. OFFICIALS ONLY

7. There are no signs whatsoever of any form of nautical experiments taking place here, and the whole waterside gives a very desolate

appearance.
